# Iryna Mikheyenka
# Senior Product Designer (UX/UI)

I design scalable digital products for international markets, with a focus on complex user flows, product strategy, UX research, design systems, and clear human-centered interfaces.

Selected work across mental health, education, provider discovery, AI-driven products, fintech, mobility, and digital platforms.

# States of Mind

**Mental health self-discovery and guidance platform**

I built the product from 0→1 and continue developing its structure, user journeys, interface logic, content experience, and scalable design patterns.

| | |
|---|---|
| **Goal** | Create a clear and supportive digital platform that helps users better understand their mental state, explore psychological topics, complete self-assessments, and find relevant next steps. |
| **My role** | Product architecture • UX flows • UI design • quiz logic • assessment results • content structure • landing pages • design system • AI-assisted visual exploration |

# Designing clarity for sensitive decisions

**A product structure that helps users move from uncertainty to understanding, reflection, and relevant next steps.**

| | |
|---|---|
| **Awareness** | Clear entry points for users who want to understand their mental state, symptoms, emotions, or personal patterns. |
| **Assessment** | Quiz and screening flows designed to feel simple, supportive, and non-clinical while handling sensitive topics. |
| **Guidance** | Result pages, recommendations, educational content, and next-step suggestions based on user responses. |
| **Content** | Article, guide, and listicle layouts that make complex mental health topics easier to read, navigate, and apply. |

# Mirari

**Designing a structured learning experience for progressive mental health education.**

I designed the learning experience, landing pages, program structure, application flow, and visual system for a progressive mental health education product.

| | |
|---|---|
| **Goal** | Make complex educational programs feel clear, credible, and easy to explore. |
| **My role** | Landing pages • curriculum structure • program cards • application flow • visual system |

# Mirari • Solution

### Designing structure for learning and trust

A clear education experience that helps users understand the program, compare modules, and move toward application without confusion.

| | |
|---|---|
| **Program clarity** | Structured curriculum blocks, phases, modules, and learning outcomes. |
| **Trust** | Faculty, methodology, science-backed positioning, and clear program details. |
| **Decision-making** | Pricing, format, duration, schedule, and application requirements. |
| **Application** | Simple entry points from program exploration to the application form. |

# PsyStandard

**Building trust infrastructure for the progressive mental health field.**

| | |
|---|---|
| **Goal** | Create a credible platform that helps users evaluate providers, understand standards, and navigate professional information with more confidence. |
| **My role** | Provider profiles • verification logic • trust blocks • methodology pages • content structure • UI system |

# PsyStandard • Solution

### Designing trust through structure

A professional platform that makes provider information, standards, and methodology easier to understand and evaluate.

| | |
|---|---|
| **Credibility** | Verified profiles, credentials, affiliations, awards, and trust signals. |
| **Structure** | Clear provider pages, tabs, service details, care options, pricing, and FAQs. |
| **Standards** | Methodology blocks, verification logic, and professional quality markers. |
| **Action** | Clear CTAs for users to contact, apply, claim, or learn more. |

Phone: +375295038321
Telegram: @iri_mikheyenka
Email: irina.mikheienko2019@gmail.com

# Impact across the ecosystem

| | |
|---|---|
| **0→1 product foundation** | Built States of Mind from concept to scalable product structure. |
| **Conversion** | Increased qualified lead conversion by 16%. |
| **Operations** | Reduced provider verification cycle from 7 days to 2 days. |
| **Scalability** | Created reusable UX patterns, components, and content structures across SOM, Mirari, and PsyStandard. |

# X Labs / JGGL

**Designing a social media experience for AI-generated content and digital creator interaction.**

A mobile-first product experience that makes AI-generated content easy to explore, create, and interact with.

| | |
|---|---|
| **Goal** | Create an intuitive mobile experience where users can explore AI-generated content, interact with a dynamic media feed, and create or manage AI-powered artist profiles. |
| **My role** | Mobile UX/UI design • AI artist creation flow • feed experience • user journeys • interface logic • usability testing • product iteration |

Email: irina.mikheienko2019@gmail.com

# JGGL • Solution

## Designing social interaction around AI-generated media

| | |
|---|---|
| **Creation** | AI artist creation flows, onboarding logic, and simple steps for generating a digital creator profile. |
| **Discovery** | A dynamic media feed designed for browsing, engagement, and continuous content exploration. |
| **Interaction** | Like, save, share, profile, and content interaction patterns adapted to a social media experience. |
| **Iteration** | Usability testing, product feedback, and design improvements based on user behavior and team priorities. |

Email: irina.mikheienko2019@gmail.com

# JGGL • Impact / Product Work

## Product work beyond the interface

A social media product where AI-generated content required clear creation flows, familiar interaction patterns, and fast design iteration.

| | |
|---|---|
| **Artist creation** | Designed a simple flow for creating and managing AI-powered artist profiles. |
| **Feed experience** | Structured the media feed to support browsing, engagement, and continuous discovery. |
| **Mobile-first UX** | Adapted familiar social patterns for AI-generated content and creator interaction. |

# QR Charge

**Designing a mobile rental experience for everyday urban use.**

| | |
|---|---|
| **Goal** | Create a clear mobile app and website experience for users renting power banks across European markets. |
| **My role** | Mobile UX/UI design • website design • rental flows • wallet logic • error states • UI kit • marketing visuals |

Phone: +375295038321
Telegram: @iri_mikheyenka
Email: irina.mikheienko2019@gmail.com

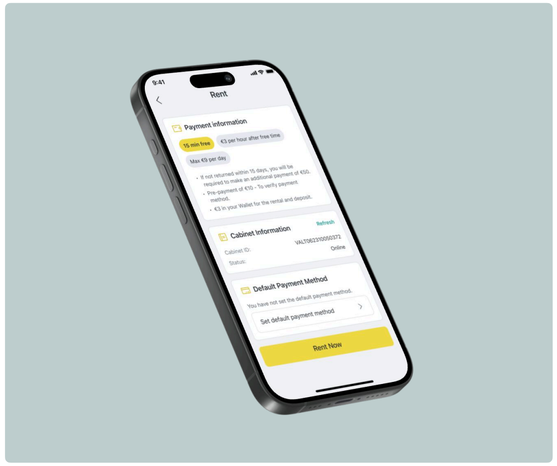

# QR Charge • Solution

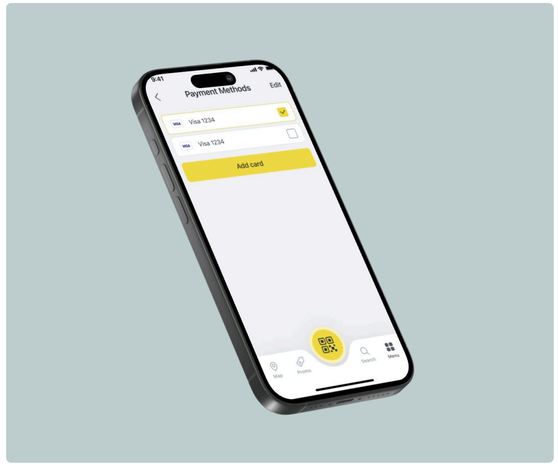

**Designing a simple rental flow for urban movement**

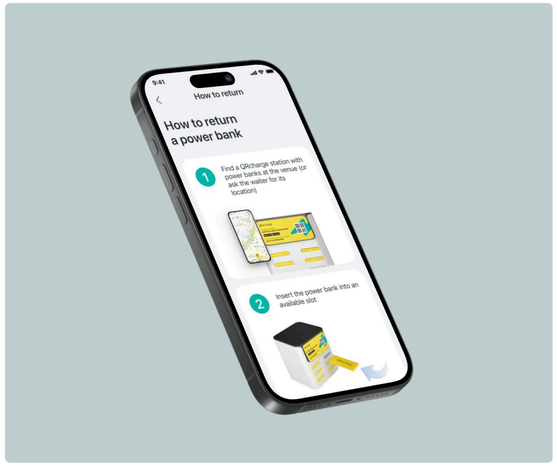

A mobile-first experience that helps users quickly rent, use, and return power banks without confusion.

| | |
|---|---|
| **Scan** | Clear entry point for scanning a station or power bank. |
| **Rent** | Simple rental confirmation with price, time, and device status. |
| **Wallet** | Balance, payment, bonuses, and active rental state in one place. |
| **Return** | Clear return instructions, success states, and error handling. |

Phone: +375295038321
Telegram: @iri_mikheyenka
Email: irina.mikheienko2019@gmail.com

# QR Charge • Impact / Product Work

### Improving the rental experience across key moments

The product required a clear UX structure for fast actions, payment confidence, and recovery from edge cases.

| | |
|---|---|
| **Core flow** | Redesigned scan, rent, active rental, and return journeys. |
| **Error states** | Created clearer states for failed scans, unavailable devices, payment issues, and return problems. |
| **System** | Updated UI kit, components, and visual patterns for better consistency. |
| **Growth** | Created product and marketing visuals to support user acquisition and brand communication. |

# My Design Process

**From research and structure to scalable interfaces and production-ready design.**

| | |
|---|---|
| **01 Discover** | User needs • business goals • competitor research • product context |
| **02 Structure** | Information architecture • user flows • content hierarchy • edge cases |
| **03 Design** | Wireframes • UI design • prototypes • design systems |
| **04 Validate & Iterate** | Usability testing • feedback • analytics • product improvements |

# Let’s work together

**Available for product design, UX/UI, design systems, and digital product work.**
